27th NEW YORK CITY MARATHON - November 2nd

Once again The New York Road Runners Club will host the 27th annual New York City Marathon on November 2nd. And, for the 27th year, Amateur Radio operators are being asked to provide communications

This race is the largest "people's" event that the city hosts each year and requires over 400 Amateur Radio operators to fulfill the unique requirements set forth by the race officials. This is the largest public service event in America each year. Come and be part of a world class event while helping over 30,000 runners achieve their dream.

Operations will take place on Staten Island from 4 AM to 11 AM, Brooklyn, and Queens from 6 AM to noon and in Manhattan and the Bronx from 7 AM to 3 PM. We are looking for those who have done public service events for years and those who have never been involved before.

Everyone receives training and a manual to help prepare for the day. If you have never done an event like this before you will be surprised at how much fun it is. The tee shirts will make you the envy of your club.

For further information, to get questions answered or to volunteer please contact the Communication Coordinator, Steve Mendelsohn, W2ML, at: w2ml@arrl.org.

The Amateur Licence Plate Problem

The NYS Department of Motor Vehicles is running extremely late in issuing new "Ham" licence plates to those who have applied for them. Since the old style plates are now expired, those hams who continue to use them are at risk of inconvenience or even arrest, through no fault of their own.

The Department is directing these individuals to physically appear at their local Motor Vehicles office, pay for a "standard Issue" licence plate, and then turn that plate in when the "Ham" plate finally arrives. This is obviously a tremendous potential burden for the motorists, and is also a very expensive solution for the Department, which must go through multiple cycles of paperwork for the plates and associated items such as insurance renewals.

The local officials are well aware of the situation and will usually try to help motorists who are stopped for using the old plates. In addition, Senator Hugh Farley has written a letter to The Honorable Raymond Martinez, Commissioner of New York State Department of Motor Vehicles, asking his aid in arriving at a reasonable resolution of the problem.

So stay tuned for updates on the situation.

Editors Note: The above contains excerpts from Sen. Farley's letter.

Mobile Radio Legalities

Here are directions for getting to the NYS law which covers "extended receive" capabilities. This is not easy and obvious but if you follow the directions you will get there.

For the NYS law go to: <http://www.senate.state.ny.us/> and select "Bills and Laws" which is the third item down on the left side. Then under Legislative Session Information select Laws of New York which is the fifth item in the list. Under "Consolidated Laws" select VAT (for Vehicle and Traffic Laws) and scroll then down to section 397 which is the specific law and print a copy of New York State Vehicle and Traffic Laws Title 3 Article 12 Section 397.

You will need to do the same for the hands free bill. It is on the same site under Article 33 "Miscellaneous Rules" and is Section 1225C, which is the provision covering the use of mobile telephones. The operative word you will see is telephone.

You will now feel like a legal scholar. Print out both sections and put them in your glove compartment.
