A Message from the President

Here we are...half way through the autumn season. The leaves are blowing around and the young Trick or Treaters will be soon be knocking upon your door. I would love to say that the weather is going to get warm again, but I know it will not. Soon we will be talking about Turkey and other holidays. So, what is an Amateur Operator to do? If you are like me, you already put together your holiday shopping wish list. I'm hoping that a new radio finds it home in the shack. So, what should we do in the mean time?

Contesting...

What a great way to hone your operating skills and have some fun working stations all over the world. There is literally a contest for every mode and form of operating. This is also a great way of making sure that your equipment is properly functioning. Give it a try.

Here is a great website to look at to see what contests are coming up:

<http://www.hornucopia.com/contestcal/>

Have fun and happy operating...

"Fun with GNURadio"

**Presented by
Tom Early, AC2IE**

GNURadio is a powerful and extensible software defined radio (SDR) development platform. GNURadio already supports a number of hardware devices that should be very interesting to any ham radio operator.

There will be very little (probably no) "canned" presentation for this discussion. Instead, a low cost, receive-only device will be shown and a more expensive transceiver device will be DEMONSTRATED.

My efforts to develop GNURadio modules that support AMBE vocoder hardware (like those used in DStar, DMR and System Fusion radios) will, hopefully, also be demonstrated.

Our Speaker: Tom Early, AC2IE

Tom Early, AC2IE, is a relatively new ham, licensed in early 2011 and enjoys public service activities. He is especially interested in all digital areas of ham radio and tends to gravitate to the software end of this area.

Tom has a Ph.D. in chemistry from the University of California, San Diego. Tom is a recent retiree from GE Global Research after a 33 year career at GE. Tom's speciality was nuclear magnetic resonance, an RF-based tool used for chemical and material analysis.

MEETING LOCATION

First Reformed Church (in the Poling Chapel)
North Church Street, Schenectady

Meeting Location

*SARA meetings will be held in the **Poling Chapel of the First Reformed Church** on North Church Street, Schenectady unless otherwise noted.*

Directions: The church parking lot is on North Church Street, on your left as you head north from Union Street.

Cross North Church Street and find the walkway between number 10 and 12 North Church. Go to the end of the walkway and enter the building.

Turn left and go through the double doors. Turn right and walk past the rest rooms. The Poling Chapel is just down the hall.

Cancellations

If Niskayuna High School cancels evening classes and activities the SARA meeting will also be cancelled.

Fall SKYWARN Spotter Training Sessions

Dear SKYWARN ECs,

We have finally put together the Fall 2016 SKYWARN Winter Weather Training Sessions. We encourage you to get the word out regarding the sessions so that we have a good signup. The SKYWARN Registration Page has been set up <http://cstar.cestm.albany.edu/skywarn/Talks.htm>

We are currently offering only three **Go-To-Meeting Webinars** as our staffing situation still remains the same (we are down approximately a third of our staff) and have no one to travel to give sessions at this time. Hopefully, by spring we will be back to or close to full staffing once again. At that time we hope to resume giving sessions on the road.

K2AE Repeaters Guidelines

K2AE Repeaters are open and visitor friendly.

1. There will be a control operator monitoring at all times. If there is no control operator, the repeater will be unavailable. (97.103 and 97.105)
2. Control operators will not discourage anyone from using the repeater.
3. Conduct on the repeaters should be governed by common sense and courtesy. Conversations should be in plain language and suitable for all listeners. (97.112 and .113)
4. No commercial business use is allowed.
5. Pause a few seconds between transmissions. The repeater will recycle. This gives a chance for other users or emergency traffic to call in. (Give even a longer pause in Winter.)
6. If someone calls "Break", operators will yield the frequency for emergency traffic. Yielding to a "breaking" or new station is common courtesy. New York State and Federal law prohibit interference with emergency traffic.
7. Operators are encouraged to use simplex whenever possible. Operators are encouraged to use the minimum power necessary to maintain clear contact, i.e. 50 Watts or more is not appropriate in close proximity to the repeater when 1 or 5 watts achieve full quieting. (97.313)
8. Use of the repeater for non-SARA public service events is prohibited unless permission from the Trustee is obtained. Please forward requests to: ak2e@arrl.net.
9. In the event of an emergency (SKYWARN, flooding, weather conditions or other emergencies) control operators will turn the repeater on if it is down.
